

## Homework expectations

Students should expect homework most days. Homework will be different each day, but should only take students approximately 20 minutes. Assignments are due the following day at the beginning of class. Homework is posted throughout the classroom and on the class website. Students are responsible for HW even when they are absent.

## Need help?

Students are welcome to stay in at lunch any day to get caught up on homework, get extra help, or study for a test/quiz.
